Green

Many homeowners are looking for ways to lessen their impact on the environment. RC Cabinets is committed to being Arizona's premier supplier of green cabinets that satisfy the desires of today's homeowners. Our sustainability efforts touch every aspect of our business and include the following:

Green Cabinet Production & Suppliers

- RC Cabinets offers multiple cabinet lines that have demonstrated their commitment to sound environmental management and sustainable practices by earning Environmental Stewardship Program (ESP) certification from the Kitchen Cabinet Manufacturers Association
- ESP-certified cabinets meet the requirements in areas such as air quality (low-formaldehyde emitting composite wood), resource management and environmental stewardship.
- Wood selection is a very visible and identifiable area where companies can demonstrate their commitment to the environment. RC Cabinets is now offering cabinets manufactured from European beech wood, which through organized forest management is an environmental sustainable species
- Cabinet boxes are manufactured from green particle board that meets stringent standards for recycled/recovered fiber content and formaldehyde emissions
- An initiative is now underway to redesign protective packaging on cabinets to be more resource efficient

Reduced Oil Dependence and Carbon Emissions from Efficient Transportation

RC Cabinets installs fine quality cabinets over a wide geographic area in metropolitan Phoenix and Tucson, and outlying parts of the state. Here's what RC Cabinets is doing to reduce our dependence on foreign oil and cut back on vehicle emissions that may harm our environment.

- A baseline of fuel efficiency has been measured and goals are set to steadily improve performance in both miles traveled and miles per gallon performance
- Fleet vehicles are being replaced with smaller, more efficient vehicles
- New supply waypoints have been established in far-lying zones to speed customer service and reduce re-supply travel
- Drivers are routed to group appointments and reduce travel
- Partial order deliveries are discouraged to reduce multiple trips to the same location
- Communication technology is used for field staff to punch in, reducing travel miles between home, office and field work locations
- Many local meetings are now orchestrated by conference call to reduce travel

RC Cabinets remains committed to the founding principles of quality, service, and value that have been the key to our success for more than 20 years. For more information, we invite you to visit our website at
