RC CABINETS ACQUIRES SPACEMAKER FURNITURE FACTORY

Tempe, AZ, July 7, 2007 --- RC Cabinets, a Tempe-based cabinet supplier for production and custom home builders, announced today the asset acquisition of the SpaceMaker Furniture Factory and its distributorship specializing in space-saving wall bed furniture systems.

The SpaceMaker Furniture Factory was established in 1986 and is a leading producer of guest room furniture in the Phoenix metropolitan area. Their mainstay wall beds are stored vertically in fine wood cabinetry and lowered easily into a fully functional bed when needed. RC Cabinets is creating a new division within the company to integrate the SpaceMaker sales and service operation alongside its existing cabinet production for kitchens, bathrooms, home offices and entertainment rooms.

"We're excited to count SpaceMaker wall beds among the products we represent to our customers," said Robert Boscamp, RC Cabinets President and Chief Executive Officer.

"Rooms that would normally go unused except for occasional visitors," Boscamp said, "can now be converted from a standard sleeping room to an office, a sewing room, a theater room or whatever best reflects the homeowner's lifestyle. Adding wall bed systems to the RC Cabinets product line was a logical progression and meets the demands of the ever changing market place.

RC Cabinets also recruited some skilled employees with years of wall bed experience, including six-year veteran Ryan Jensen who becomes the new SpaceMaker Division Manager.

"This is a great product for a growth-oriented company like RC Cabinets," said Jensen. "This product appeals to a lot of people and trends in urban living, downsizing and work from home stimulate new demand to add more everyday living space without sacrificing comfort."

-more-

“Together, wall beds systems and cabinet remodels can transform unused space while potentially increasing the resale value of a home,” Ryan said.

RC Cabinets manufactures and distributes its own line of custom cabinetry and, installs and services several cabinet brands including OakCraft, Mid Continent, and UltraCraft. The company serves many of the valley’s top-ranked production and custom home builders and is one of Arizona’s premier cabinet companies. Its headquarters are located at 4646 South Ash Avenue, Suite 101. More information can be found at www.rccabinets.com and www.thespacemaker.com.
