**RC Cabinets Partners With Robson Communities and OakCraft on Recycling Initiative**

December 5, 2008 Tempe, AZ. Tempe based cabinet company, **RC Cabinets** has partnered with **OakCraft**, a regional cabinet manufacturer, headquartered in Peoria, AZ to reuse then recycle all of the packaging material for cabinetry installed at PebbleCreek, a Robson Resort Community. In a collaborative effort to reduce waste and increase awareness, RC and OakCraft made a “zero waste” commitment to Robson’s PebbleCreek, the pilot community for the program.

The new protocol calls for installers to save all packaging material, which is 100 percent recyclable cardboard. OakCraft will pick up the material on one of its normal deliveries avoiding a dedicated trip. The cardboard will be reused two to five times then bundled for recycling. On average, the initiative will keep 525 shipping cartons out of the landfill every month and reuse will limit new carton production by 350 cartons per month. An average cabinet is protected by a carton that uses 40 square feet of cardboard. Total usage reduction per month is approximated at 21,000 square feet of cardboard and packaging material.

PebbleCreek will be the first of the Robson communities to institute the new program. Rollout statewide to all of Robson’s Active Adult Communities will begin in 2009. In a statement by **Bob Boscamp CEO of RC Cabinets**, Boscamp remarked “RC Cabinets is thrilled to be a driving force in this program and we look forward to implementing similar initiatives everywhere we install cabinets.” **Chris Harrison, Senior VP for Robson Communities** said, “We are committed to reducing our impact on the environment and this initiative is a great step in that direction.”
